# Memory | Accessories

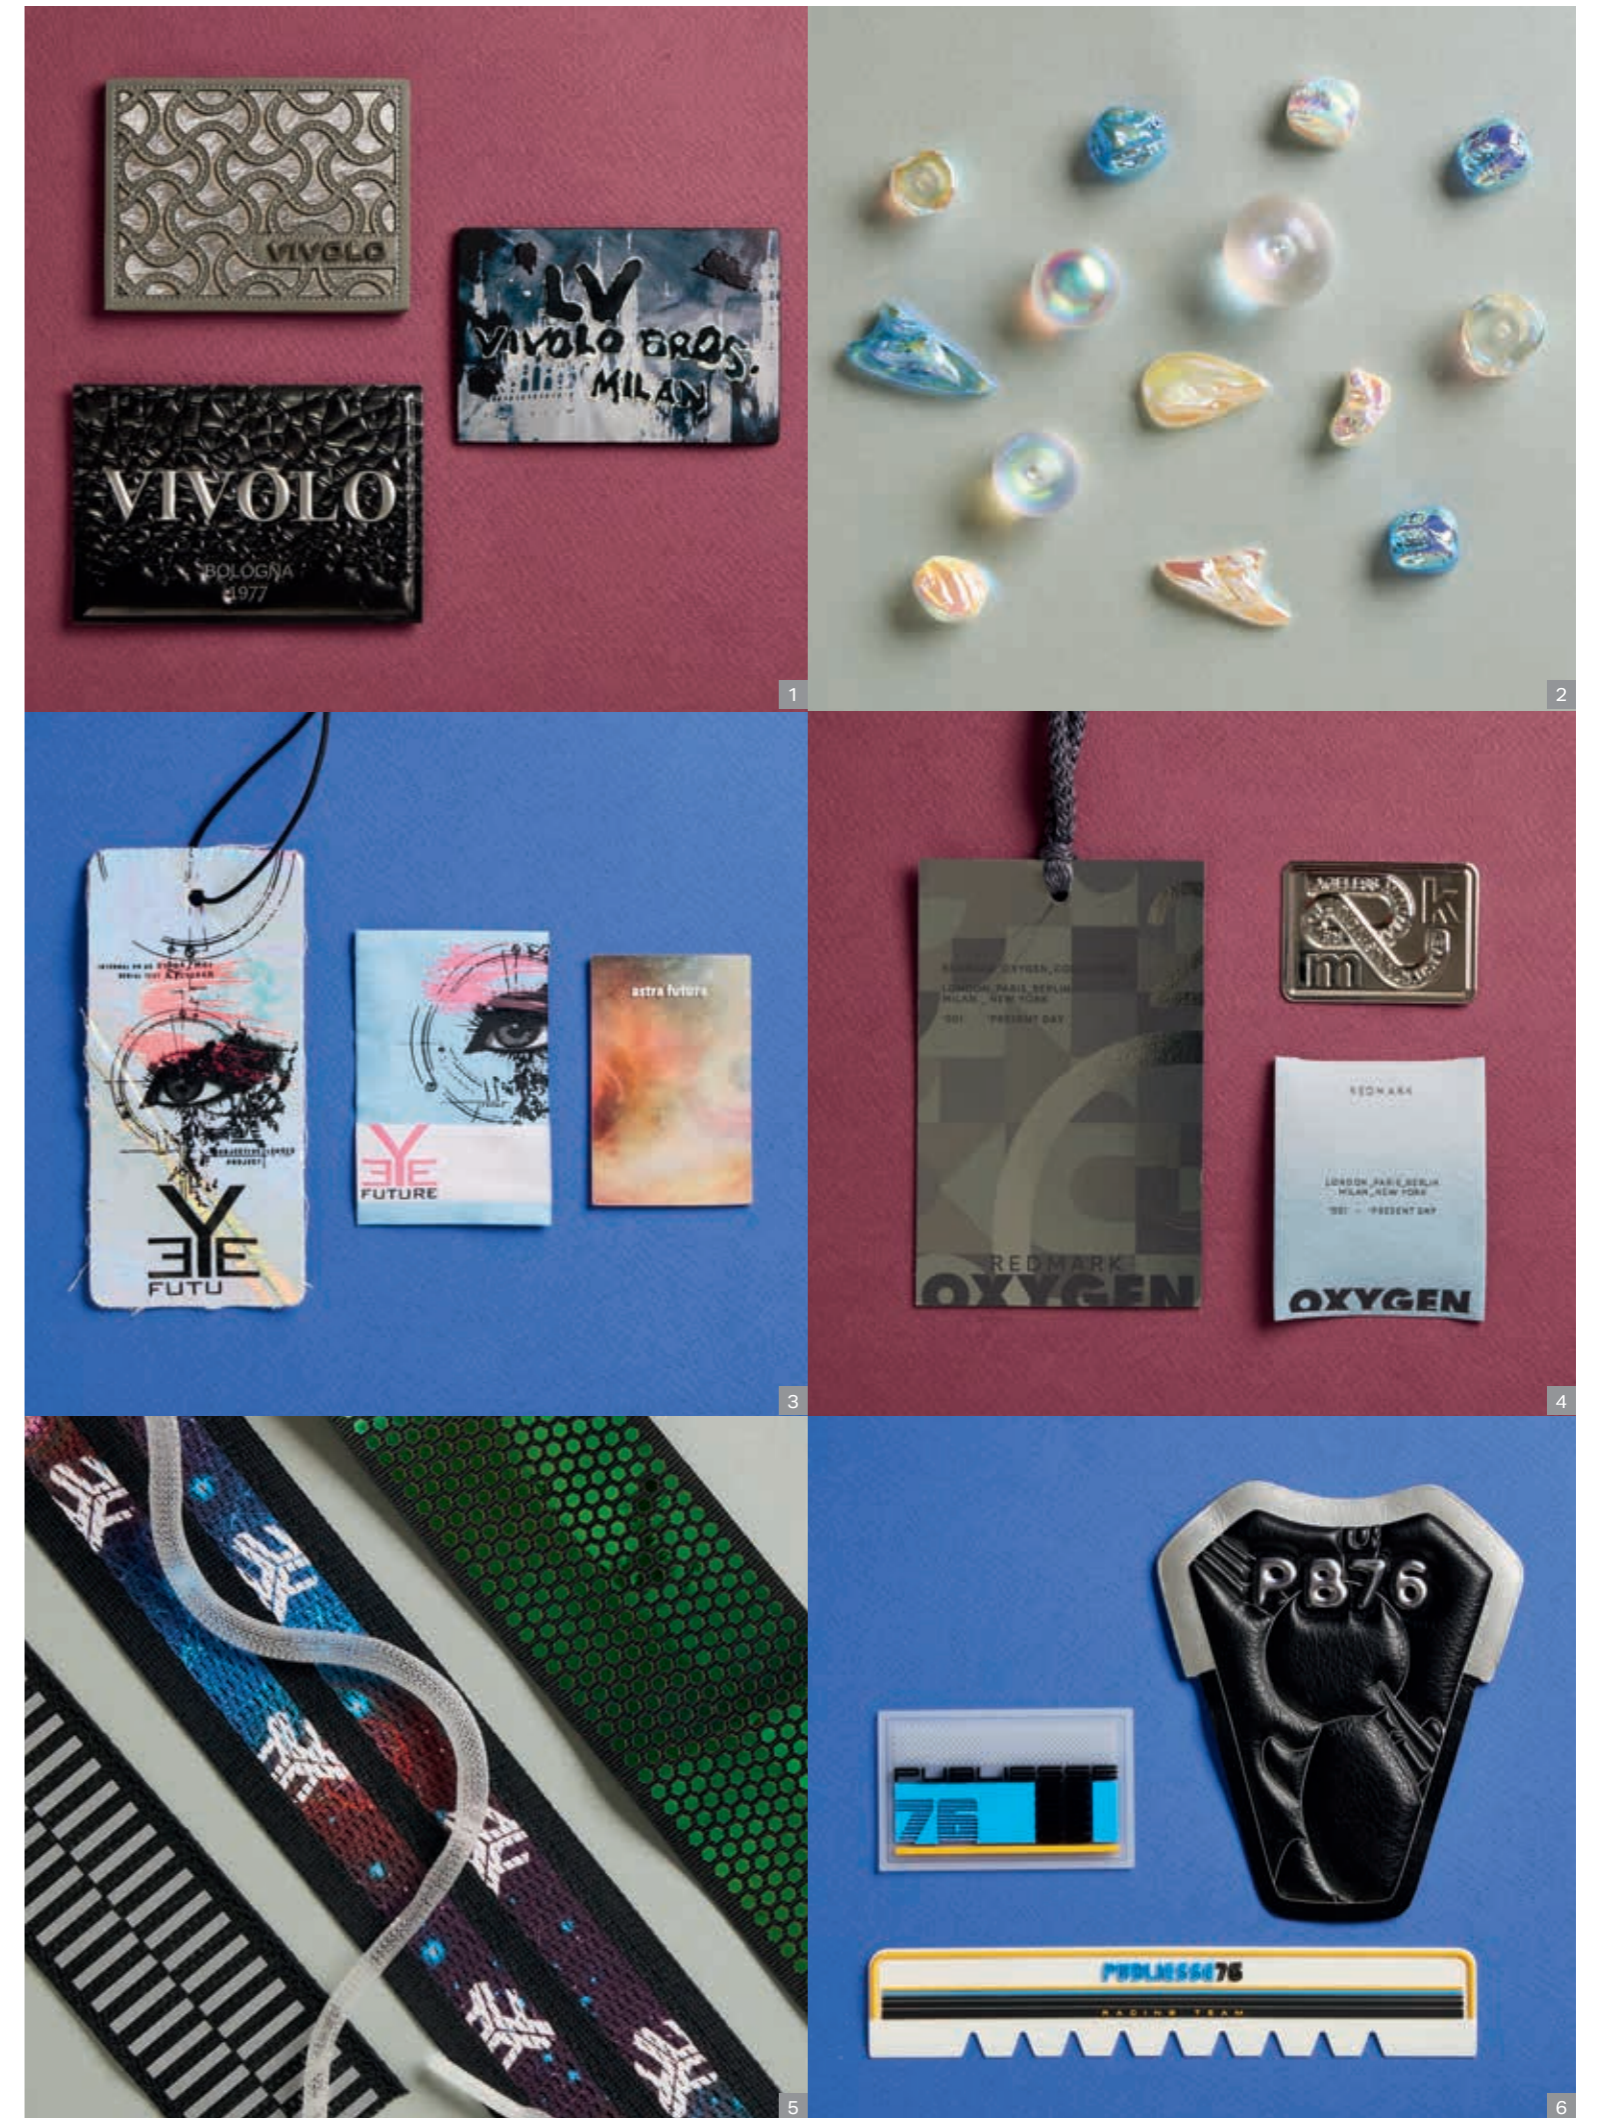

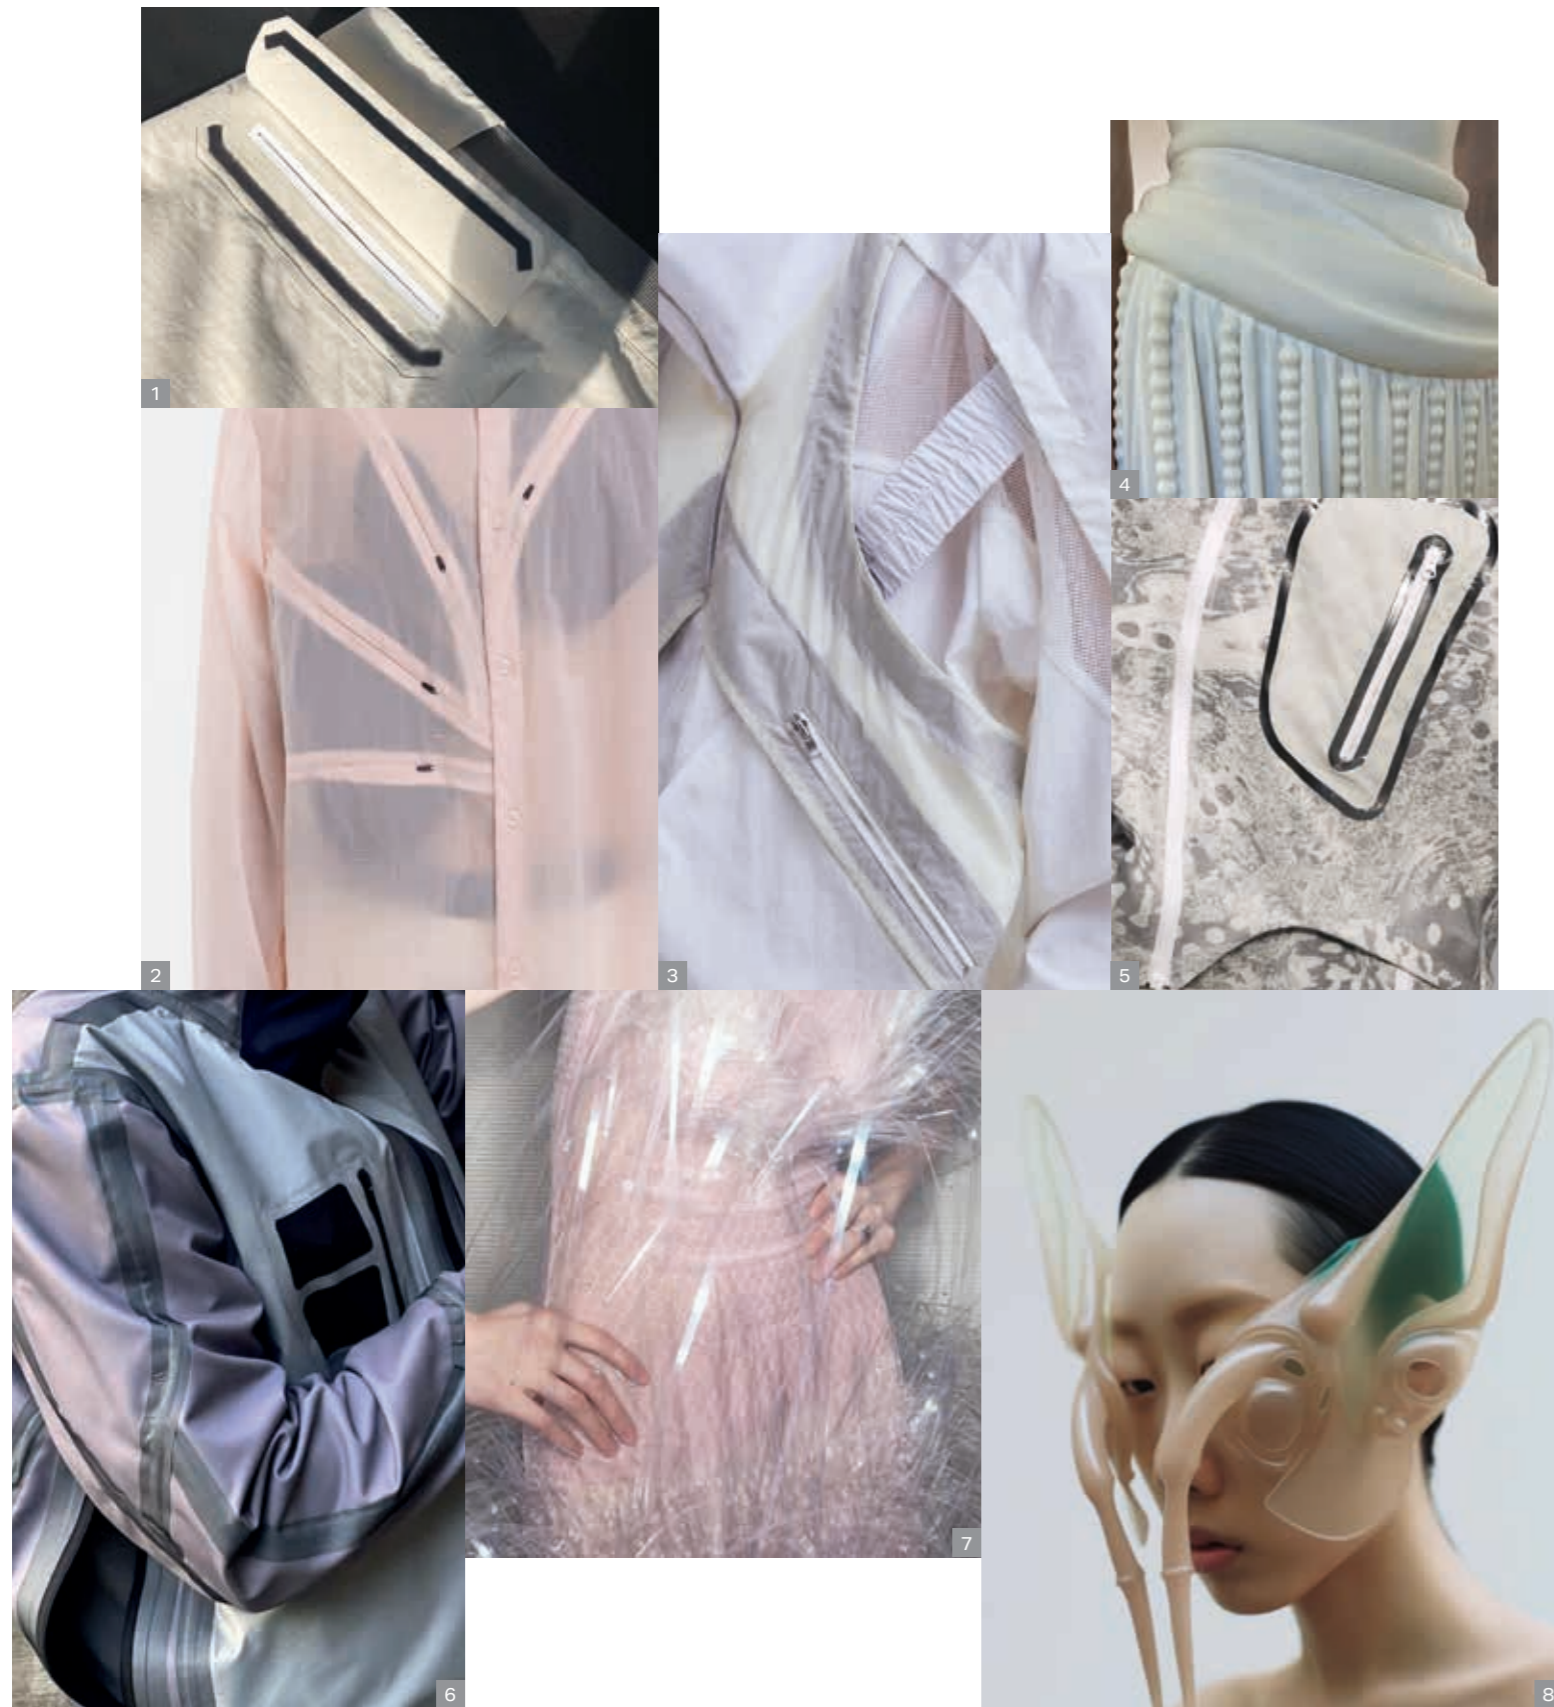

Unlock the treasure trove, stitching antique buttons and bows to contemporary pieces. Faded florals are added in 3D appliqué or printed braids and bindings. There is a focus on hand-stitching and visible mending. Pearls and ornate jewellery box finds are made into buttons or pinned on as brooches. Grosgrain ribbons and neat frills decorate cuffs and necklines whilst duchess satin is twisted into petal like shapes or wayward bows on shoes and clutch bags.

Sphere | Trims & details

Glued and sealed trims offer outdoor protection and a clean aesthetic. Innovative embossing is mixed with 3D printed tags, metallised coated plackets and sheer panel inserts. Curvaceous buckles and morphing button designs come in high-tech finishings and mirroring effects. Seamless 3D knit trims and bonded laser cuts provide a dynamic aesthetic. Transparencies in mesh overlays, nylon cords and feathery synthetic add-ons bring lightweight allure.

Creator | Trims & details

Trims are a creative collage of multiple qualities, origins and making. In an overwhelming mix of digital experiments and expressive handmade crafts, details bring expression and joy. Synthetic coatings and polished surfaces collide with strass embroideries, fuzzy ribbons, tactile woven trims and sheer tulle add-ons. Buttons and clasps come in sculpted clay and translucent eco-polyester designs with a digitalised aesthetic. Spray paint printed ribbons and soft bonded badges are decorated with 3D digital printed textures and high-tech glassy coatings.
